Located in the Sandhills of Nebraska, Daniels Manufacturing Co. has been manufacturing the world's finest livestock handling equipment since 1958.

Priding ourselves in staying on the cutting edge of the livestock handling equipment design and manufacturing. We will continue to offer bold and revolutionary new products relating to livestock, their care, and processing.

Due to high demand of facility drawings and changes to customer plans, we will be charging a fee for ALL CAD drawings, consulting, and travel expenses.

All designs, drawings, and pictures are the sole property of Daniels Manufacturing Co. and reproduction is strictly prohibited. If our designs or drawings are incorporated into your facility and equipment is purchased or installed, this fee will be waived.

As always, all of our products come with a Limited Warranty.

Low Stress Cattle Handling Mission

In the feedlot industry today, we are challenged with an increased rate of musculoskeletal injuries that occur as a result of poor facility design and mishandling of the cattle. As we move forward our cow/calf and feedlot industries are becoming more aware and prioritizing the animal's well-being and care of cattle.

Daniels Manufacturing Co. of Ainsworth, Nebraska has been a progressive and innovative designer of livestock handling facilities across the world. Australia, Canada, South Africa and Europe are among some of the locations outside of the U.S. In the U.S, we have designed facilities for the top 20 cattle producers in the industry, and many other feeding operations.

Selecting the right equipment, is vital to the well-being of the livestock. While many snake alleys are V-floored and curved, Daniels alleys are straight with adjustable sides (manual or hydraulic). This design is centered around the normal instincts of the animal, which is to go in straight lines and allow them to walk with a normal base. Cattle also like to see what is pressuring them.

The Bud Box and Double Alley are designed with open sides to allow cattle to see the handler and react to their position and movement. The hydraulic chute has been upgraded several times to incorporate the ideas from many handling experts. It is by far the quietest and most user-friendly chute on the market. With its unique squeeze design, neck extenders, and convenient hydraulic operating system, the Daniels squeeze chute is the best on the market.

*Thank you to everyone who has supported us through the years!
We are proud to be a family owned business
that puts the needs of our customers first.*

*We look forward to working with our current customers
and new ones for many more years to come.*

The BurnBucket

FOR SALE AT Daniels Manufacturing Co.

\$1,200.00 plus tax & shipping

What Is The BurnBucket?

The BurnBucket is built using heavy gauge steel for durability, easily outlasting the traditional barrel by many years.

Burns Things Fast.

- Burns fast and hot. Incinerates combustible debris.
- Air intake cutouts efficiently burn at any layer.
- Expanded metal top door to keep airborne materials inside.

Dumps With Ease.

- No more un-burnt debris stuck in the bottom of a barrel.
- Clam shell dump allows for effortless emptying.
- The SAE J2513 quick attach plate allows for a common equipment hookup.

Dan-D Rancher Chute

The Dan-D has a new unique design that has many benefits.

- It allows the chute to be as strong and quiet as our AH chutes with less cylinders.
- It has a parallel squeeze opening up to 34" allowing bigger critters to comfortably enter and exit the chute without catching hips and also allowing all four feet to be on the floor for a natural stance.
- It is designed to have no moving parts at the bottom of the chute. This helps functions from being frozen up in the winter and also allows for easier clean up.
- The Dan-D has kept the taller ranchers in mind allowing for 6'6" of head clearance, while using the palpation.
- All Dan-D models will come standard with our adjustable sternum bar, palpation doors, neck stretchers, and swing arm for the valves.
- The Dan-D will be offered in stationery and portable models.

Stationary \$25,000.00

Portable \$31,800.00

****Both prices include the power unit****

Portable Alleyway

Our Portable Alleyway is the fastest, easiest, and safest way to process cattle in a straight line!

Due to the daily rising costs for iron and parts, please contact us for pricing and options available.

Available Lengths: 32' 38' 44'

The latest version of our Portable Alley features a side swing gooseneck hitch for quick and easy setup. It also includes no-backs and side squeezes that are adjustable and undated heavy duty spring loaded jacks that operate simultaneously. With the addition of brass bushings to hinge points, this is undoubtedly the quietest alley produced in the market today!

**New
Quieter
Operation!**

All hinge points and moving parts now have oil impregnated brass bushings to reduce noise levels and increase longevity!
