What Is The BurnBucket?

The BurnBucket is built using heavy gage steel for durability, easily outlasting the traditional barrel by many years.

Burns Things Fast.

- Burns fast and hot. Incinerates combustible debris.
- Air intake cutouts efficiently burn at any layer.
- Expanded metal top door to keep airborne materials inside.

Dumps With Ease.

- No more un-burnt debris stuck in the bottom of a barrel.
- Clam shell dump allows for effortless emptying.
- The SAE J2513 quick attach plate allows for a common equipment hookup.
